SUPER twin modular system

designed like no other...

NO MORE LEVER PUSHING

- rotating bucket style feeding
- finger-tip operation with uncompromised safety and speed
- no springs, no weights, no long levers

TOOL-FREE BARREL/SCREEN REMOVAL

- **ALL STAINLESS STEEL BARREL & AUGERS** completely eliminates contamination/staining of clay
- bayonet lock barrel - just twist and pull to remove
- no technical experience necessary to disassemble
- no more rusted /frozen bolts & lost spanners
- remove the screen in seconds for cleaning

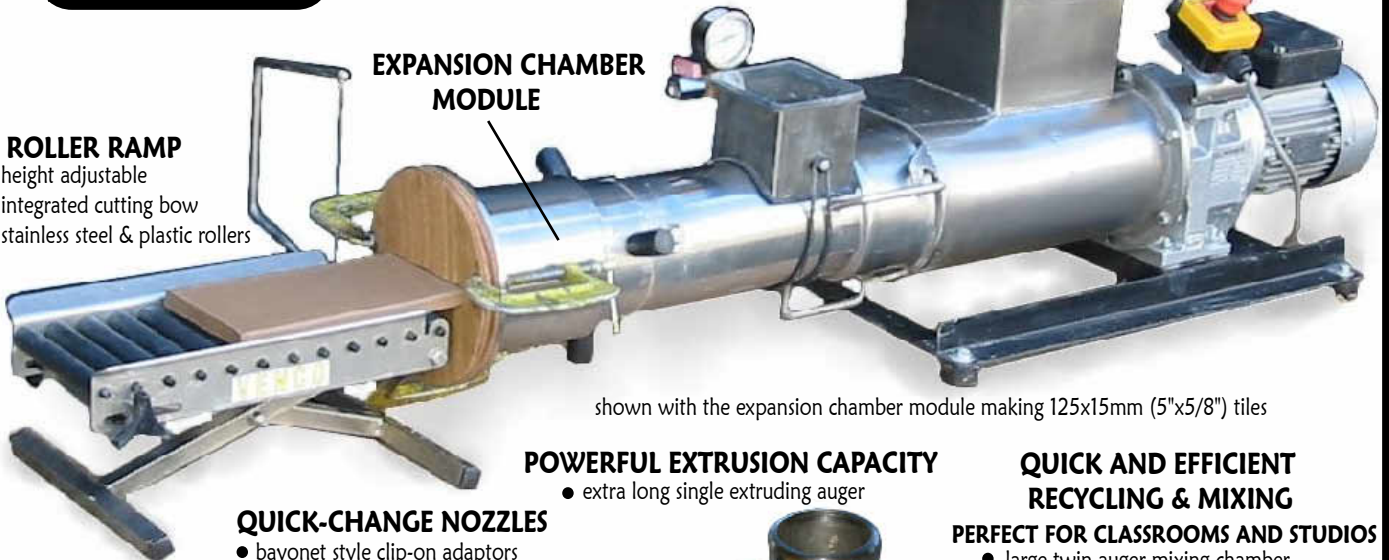

REMOVABLE VACUUM CHAMBER

- remove the assembly in seconds for cleaning

EXPANSION CHAMBER MODULE

ROLLER RAMP

- height adjustable
- integrated cutting bow
- stainless steel & plastic rollers

shown with the expansion chamber module making 125x15mm (5"x5/8") tiles

POWERFUL EXTRUSION CAPACITY

- extra long single extruding auger

QUICK-CHANGE NOZZLES

- bayonet style clip-on adaptors allows up to 125mm (5") extrusions

optional hollow die holder

standard nozzle 80mm (3")

optional extruding module

QUICK AND EFFICIENT RECYCLING & MIXING

PERFECT FOR CLASSROOMS AND STUDIOS

- large twin auger mixing chamber
- two inter-meshing augers effectively crushes dry scrap for even blending
- non de-air up to 500kg/hr (1100lb/hr)
- de-air up to 400kg/hr (880lb/hr)
- blending different bodies 120kg/hr ++ (250lb/hr++)

...to be the most versatile

Recycle, mix, de-air, extrude
