

INSTRUCTIONS FOR GROMMETS INSTALLATION NO.3 POTTERY WHEEL.

There are a total of 8 grommets located as below and it is important that they are all replaced at the same time.

- 2 x small grommets in the U-bracket where the motor is mounted and pivots.
- 1 x small grommet on the longer arm of the U-bracket which takes the connector link to the foot pedal cross shaft.
- 1 x small grommet on the foot pedal cross shaft.
- 2 x large grommets on the foot pedal cross shaft.
- 2 x large grommets on the motor mounting U-bracket cross shaft

Installation

- Totally strip the Pottery wheel right down and then install the grommets by heating and softening with a hot air gun or hair dryer.
- Make sure that the bushes are greased liberally (any grease will do, including Vaseline).
- With the wheel stripped down, undo the drive wheel and take out the wheel head and re-grease the wheel head bearings.
